

# Environmental Policy

---

## Policy Statement

Savills Project Management is a leading national professional project management business that leads rather than follows. We foster a working environment that is committed to achieving results while considering our environmental impact and operating in an environmentally responsible way.

We believe the key to our success and achieving our objectives is our people working together and consulting with each other.

## Legal Statement

We are committed to complying with all applicable environmental legal and other requirements, and standards subscribed to that relate to our business.

## Key Objectives

We continually seek to:

- Where possible and appropriate, reduce our environmental impact
- Provide our people and others, as appropriate, with regular information, instruction, training and supervision to ensure compliance with our environmental management system requirements
- Review our environmental aspects and impacts with the aim to improve our performance
- Review our policies, processes and systems periodically to ensure they remain relevant, appropriate and in accordance with legislation
- Provide sufficient resources to ensure the Environmental Management system is properly implemented and maintained
- Monitor and review the environmental performance of the business

## Responsibilities

Success in our business and the achievement of our objectives relies on our people taking responsibility for environmental performance and outcomes by

- Complying with our environmental policy and our Business Management System processes
- Advising management of any environmental issues to allow follow up, taking appropriate action to resolve any issues, with the aim to continually improve and reduce our environmental impact
- Consulting and cooperating with our people and others as appropriate
- Understanding the responsibilities inherent to their role
- Understanding and using the applicable business systems
- Participating in applicable training
- Actively participating in the recycling programs available in the workplace.
